

NEW DESIGN

reusable **egg trays**

Egg tray

290x290xh40mm

4 trays per set (32 trays in total)

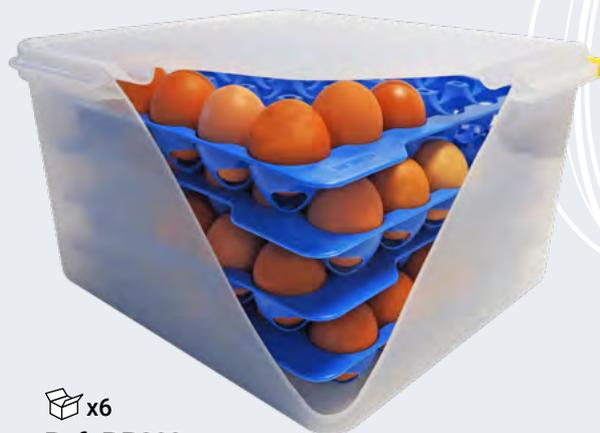

Ref. DP208

30 eggs per tray

Airtight container

GN 2/3 h200mm

+ 4 egg trays

Ref. DP209

It is recommended moving eggs immediately on receipt from the original supplier's packaging to a clean storage box to prevent possible contamination of storage areas. This best practice is especially important since traditionally eggs have been a source of transmission of Salmonella (both the egg itself and the cartons), so the change of packaging is advisable.

Perforated base

Allows **air circulation around the eggs**, preventing forming of mold.
Any broken eggs can be easily identified.
Dishwasher safe - fast drying design.

The **trays can be nested** when empty to optimise storage space.
Loaded trays can be stacked thanks to 14 supports on the underside of the trays which link with the top of the tray below.

Side grippers for easier transportation.

Space for indicating best before date - copy and record the best before date that appears on the egg or original packaging.
