

# Tork Mini Jumbo Toilet Roll Advanced

120238

Think ahead.

## Description

The Tork Mini Jumbo system stands for time efficiency and reduced cost, offering much more toilet paper than standard rolls. Tork Mini Jumbo Toilet Roll Advanced 2 ply balances cost and performance and is suitable for medium to high-traffic locations.

- High capacity: less maintenance and reduced risk of paper shortage
- Attractive décor: designed to make a great impression
- Tork Easy Handling® Packaging
- Advanced
- General public use
- Embossing

## Certifications

Tork Advanced

## Product Details

Embossing	Yes
Print	No
Roll diameter	18.7 cm
Roll length	170 m
Sheet length	20 cm
Ply	2
Roll width	9 cm
Core inside diameter	5.9 cm
System	T2
Color	White

## Shipping Data

	Consumer Units (CON)	Transport unit (TRP)	Pallet (PAL)
EAN	7322540489989	7322540489996	7322540948813
Packaging Material	Plastic	-	-
Pieces	1	12 (12 CON)	420 (35 TRP)
Height	90 mm	180 mm	1,421 mm
Length	188 mm	561 mm	1,200 mm
Width	188 mm	374 mm	1,000 mm
Gross Weight	247.26 g	6.65 kg	232.68 kg
Net Weight	520.2 g	6.24 kg	218.48 kg
Volume	3.18 dm3	37.77 dm3	1.71 m3
Layers Per Pallet	-	-	7
TRP Per Layer	-	-	5

## Environmental Information

### Content

The product is made from

Fresh fibers

The packaging material is made from paper or plastic.

### Material

Fresh fibers

Essity has an ambitious target that all raw materials derived from wood-based fresh fiber used in the production of our products is certified either in accordance with the FSC® or the Program for the Endorsement of Forest Certification (PEFC™). In addition, all wood-based fresh fiber shall fulfil the FSC® Controlled Wood standard, including third party verification. The Essity Fiber Sourcing Policy describes this in more detail and can be found on [www.essity.com](http://www.essity.com).

Fresh fiber pulp is produced out of softwood or hardwood. The wood is subject to chemical and /or mechanical processes where the cellulose fibers are separated out and lignin and other residuals are removed.

Bleaching is a cleaning process of the fibers and the aim is to achieve a bright pulp, but also to get a certain purity of the fiber in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.

### Chemicals

All chemicals (process aids as well as additives) are assessed from an environmental, occupational health and safety and product safety point of view.

To control product performance we use additives:

- Wet strength agents (for Wipers and Hand Towels)
- Dry strength agents (is used together with mechanical treatment of the pulp to make strong products like wipers)
- For colored papers dyes and fixatives (to secure perfect fastness of the color) are added
- For printing products printing inks (pigments with carriers and fixatives) are applied
- For multi ply products we often use water soluble glue to secure the integrity of the product

In most of our mills we do not add optical brighteners.

We do not use softeners for professional hygiene products.

High product quality is secured through quality and hygiene management systems throughout production, storage and transport.

In order to maintain a stable process and product quality the paper manufacturing process is supported by the following chemicals/ process aids:

- defoamers (surfactants and dispersing agents)
- pH-control (sodium hydroxide and sulphuric acid)
- retention aids (chemicals that help to agglomerate small fibers to prevent fiber loss)
- Coating chemicals (that help to control the creping of the paper to make it soft and absorbent)

To reuse broke we use:

- Pulping aid (chemicals that help to repulp wet strong paper)

In the cleaning of our waste water we use flocculation agents and nutrients for the biological treatment to secure that no negative impact on water quality comes from our mills.

<b>Environmental certification</b>	<p>This product is certified for the EU Ecolabel with certificate number SE/004/001.</p> <p>This product is certified for FSC® with certificate number SA-COC-008266.</p>
<b>Packaging</b>	Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes
<b>Article creation date and latest article revision</b>	<p>Date of issue: 24-02-2025</p> <p>Revision date: 18-02-2026</p>
<b>Production</b>	This product is produced at Skelmersdale - GB mill.
<b>Destruction</b>	This product is suitable to be taken care of in the normal sewage system of the community.
