

SHELVING ASSEMBLY INSTRUCTIONS

PUSH PUSH

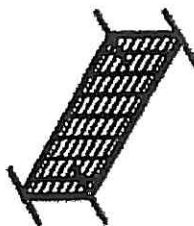

PUSH PUSH

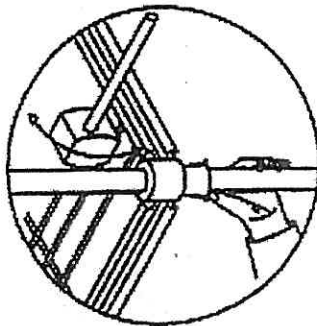

1. Start Gripper on to the post by pushing oval gripper down on the lugs provided.

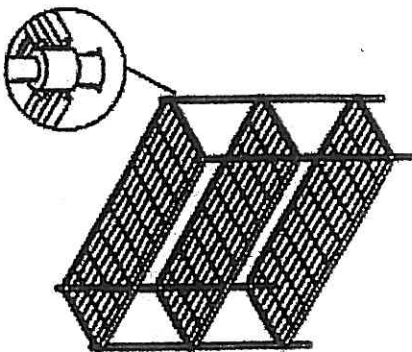

2. Continue to push the gripper down to the desired position, using lugs as indicated.

3. Place the shelf on its side and slide the posts through to corners of the shelf, to the gripper.

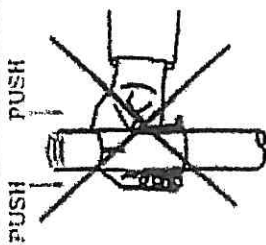

4. Place the unit upright and tap on the channel at the corners using a rubber headed mallet or similar tool, whilst supporting the base of each gripper, to fix in position.

5. Continue by placing grippers and shelves from the top of the unit to the number of shelves required. Finally tap corners of all shelves to achieve rigidity

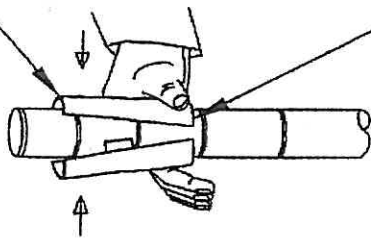

Note: For maximum stability it is advisable to place the bottom shelf as low as possible but allow cleaning gap. On mobile units the lower shelf should be as close to the castors as possible. "Guarantee registration, to register for your guarantee on the Craven product you have purchased please call the Sales Team on 01423 796200"

Note: Don't grip the sides simply push down on the lugs

Note: if grooved posts used see reverse for detail

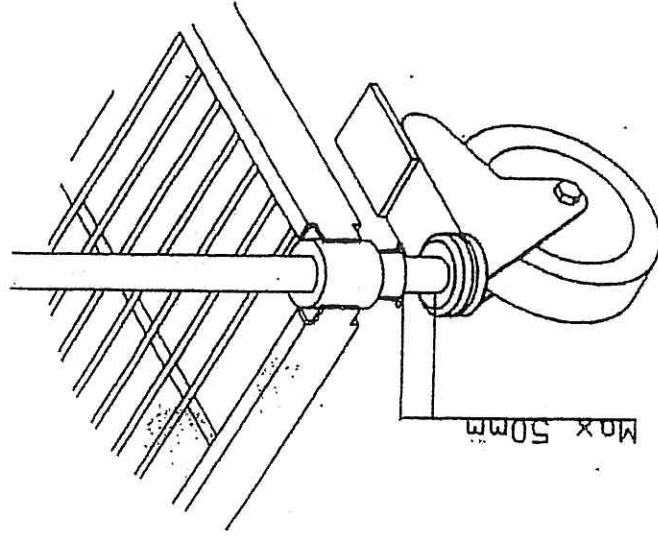

narrow part to top

clip split grippers together so that the ridge on the inside is in line with the groove in the post.

wide part to bottom

Note: This is for the grooved posts. Follow the remainder of the instructions for the assembly on reverse. Remember to tap the shelf into place with a rubber mallet.

Note: On Mobile units the base of the gripper must be within 50mm of the lower end of the post.
