

# COMPACT BRUSHLESS BLENDER #66

Silence, Safety, Power

Bold and innovative. That is the way Santos has designed its new compact brushless blender #66. A multiple technologies blender, **available in demo on our booth L66M63 at HOST show.**

*The quietest blender without sound enclosure on the market!*

Thanks to its 9 optimized programs, the brushless blender #66 is perfect to make cocktails, smoothies, milkshakes, iced coffees, and any other mixed drink.

It is quiet and offers **excellent energy efficiency** thanks to its brushless motor. It can be used intensively all day **without overheating.**

The patented two-way rotation of the blade, **unique on the market**, crushes and blends any kind of ingredients in a few seconds, including ice cubes and frozen fruits.

Its **lid detection** generates the immediate stop of the motor when the lid is opened or when the bowl is removed from its base. This technology is **unique in the world** and ensures the operator's safety.

The compact Brushless Blender #66 can be used either **countertop or in-counter**, without any additional option (simple and quick dismantling of the base).

## Advantages of the brushless technology

Equipped with a permanent magnet rotor, the brushless motor lasts 10 times longer than a universal motor and offers many advantages:

- No maintenance
- Long lifetime
- Quiet
- Excellent energy efficiency
- No overheating
