

## SANTOS SOLUTIONS AGAINST FOOD WASTE

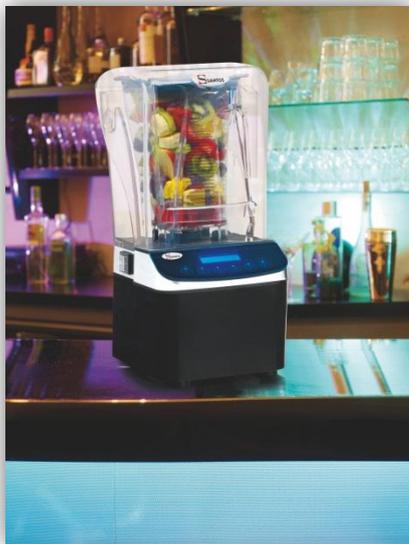

**Santos gets involved in the fight against food waste**, which is becoming a major concern in our society. A National agreement, which aims to reduce food waste by 50% in France until 2025, was recently adopted.

Unfortunately, there is still a large quantity of food that is thrown away in restaurants, institutional catering and supermarkets, while it is still edible.

We are all able to reduce food waste with simple tricks. With Santos juice extractors and blenders anyone can easily give a second life to the damaged fruits and vegetables turning them **into a popular product**, rich in vitamins and healthy: the **smoothie**.

Some supermarkets already started to use our juice extractors and blenders to prepare fresh juice and smoothie with their too ripped or damaged fruits and vegetables.

Get involved against food waste and turn your loss in a benefit!
