From Freezer to Oven safely: To prepare meals ahead or freeze leftovers. The Pyrex® brand has designed COOK&FREEZE, a range of heat-resistant sustainable borosilicate glass storage containers, that allows the user to transport from the fridge or freezer to the microwave or conventional oven safely without the plastic lid. COOK&FREEZE glass containers have been designed to have a 220° thermal shock resistance. The products are nestable for optimal storage in both the fridge/freezer and cupboard. The glass does not retain strong flavours and is stain resistant. Very easy to clean and dishwasher safe.
