

PRODUCT CODE GF956
CARE AND MAINTENANCE OF LEATHER CHAIRS

Natural leather offers ideal comfort in hot and cold climates, due to its excellent breathability. If you have purchased one of our leather chairs please pay attention to the following instructions:

Maintenance:

Periodically dust your chair with a clean, dry soft cloth.

It is safe to use proprietary Leather Cleaning products that consist of Neutral Soap Solutions and Conditioners - please refer the Manufacturer's Instructions for suitability and use of those products.

For Dried Soiling:

Gently brush with a soft brush or gently clean with a vacuum cleaner.

For stains from soft drinks, coffee, tea or milk:

Remove the excess liquid from the surface by wiping with a cloth or absorbent paper. With a clean cloth, dampened with a mild solution of water and neutral soap, gently rub the stain from the outside inwards. Do not soak the leather surface and dry immediately with a clean cloth. Do not dry the leather in sunlight or by using a hairdryer. Use only water and neutral soap.

For stains from Greasy substances (oil, Tomato Ketchup, egg, chocolate)

Gently remove the excess substance from the surface with absorbent paper, taking care not to press, so as to avoid the substance becoming ingrained in the leather's pores. With a clean cloth, dampened with a mild solution of water and neutral soap, gently rub the stain from the outside inwards. Dry immediately with a clean cloth. Use only water and neutral soap.

Caution:

The use of non-recommended cleaning products could irreparably damage the leather causing discolouring and rifting.
