Round, reusable Silicone Lids ideal for protecting food during preparation and storage in bowls of any type of material - glass, plastic, melamine, stainless steel or wood. The lids, when fitted safely on the correct bowl size/diameter, are leak proof and stackable. The Silicone Lids are resistant to extreme temperatures -40C to +200C and suitable for use in the oven, microwave and freezer.

They are dishwasher safe and water repellent which makes them extremely durable and hygienic.
